Hi Gerardo,

Once you have made a decision on what to do with this permit issue, can you please let me know? I'd like to see who to put Danielle or anyone else in the citizen group in touch with.

Thanks,

Janice

Janice,

FYI, due to recent staff departures in the Permits Office, I am transitioning to a different geographic area emphasis with respect to permitting oversight. I have been assigned to the Northern California Team and the Arizona districts have been reassigned to Lisa/La Weeda/Roberto. I think it makes sense to contact them regarding Hickman. I have spoken to Richard Sumner, air program manager at Maricopa Co, and Balaji Vaidyanathan, ADEQ, about Hickman and it hasn't gotten any traction with them that Hickman doesn't have an air permit. I will copy Gerardo on your note to see if he feels this should be elevated to Colleen McKaughan.

Hi Manny,

I spoke with Danielle Diamond, who had initially contacted us about the potential air and water issues with Hickman, last Friday afternoon. She had the same (and more) questions as the ones she stated in the initial email. Is it okay with you if I connect her with you regarding air permit issues? She's looking for options. I think her main concerns are what ADEQ can do, and what Region 9 can do with or without the agricultural exemptions.

Again, please let me know if I may put you two in touch.

Thanks,

Janice
